

21 May 2020

Dear TRL Fishery Licence Holder,

TRL Total Allowable Catch for the 2019-20 Fishing Season is now 434,785 kg

I am writing to advise that Senator the Hon. Jonathon Duniam has determined an increase to the total allowable catch (TAC) of tropical rock lobster (TRL) in the Australian waters of the TRL Fishery from 392.917 tonnes to 434.785 tonnes for the 2019-20 fishing season (*Torres Strait Fisheries Tropical Rock Lobster (Total Allowable Catch) Amendment Determination (No. 2) 2020*). An increase of 41.876 tonnes.

This TAC increase is consistent with further catch sharing arrangements between Australia and Papua New Guinea (PNG) recently agreed under the Torres Strait Treaty. The further agreement relates to the catch entitlement of 101.867 tonnes that has been set-aside in Australian waters for PNG boats to fish under cross-endorsement arrangements. On 5 May 2020 the PNG National Fisheries Authority advised AFMA, that subject to any PNG nominations for cross endorsement, NFA would only seek to access 60 tonnes of the 101.867 tonnes. Through preferential entitlement under the Article 25 of the Treaty, NFA and AFMA agreed for Australia to access the remaining amount of 41.867 tonnes.

This agreement results in a final TAC for the TRL Fishery of 434.785 tonnes which, in accordance with current quota unit holdings means a final TIB TAC share of 287.835 tonnes (increased from 260.118 tonnes) and a final TVH TAC share of 146.95 tonnes (increased from 132.799 tonnes) to be allocated to individual TVH licence holders. In line with the increased TAC please find the kilogram value of each quota unit and available catch for each TRL fishery sector outlined in the Table 1 below.

Table 1. Quota unit value and available catch for each TRL fishery sector under the increased TAC. All weights are provided in unprocessed weight in kilograms.

TRL Fishery Sector	TAC (kilograms)	Number of quota units	Value of each quota unit (kilograms)	Available catch (kilograms)
Traditional Inhabitant Boat (TIB) licence holders	434,785	662,016*	0.434786	287,835.49
Transferable Vessel Holder (TVH) licence holders		337,981		146,949.51

*held in trust by the TSRA

As always, licence holders should familiarise themselves with all management arrangements that apply in the TRL Fishery prior to the commencement of fishing. Further information can be

found on the PZJA website at www.pzja.gov.au or by contacting AFMA. Additional information regarding how each TRL sector's catch will be monitored is provided in Enclosure to this letter.

Should you have any further questions on the matters covered in this letter, please contact Georgia Langdon at the AFMA Thursday Island office on 07 4069 1990 or at georgia.langdon@afma.gov.au. If you would also like to receive future management updates by email or SMS please contact the AFMA Thursday Island office to update your contact details.

Yours sincerely

Selina Stoute
Senior Manager, Torres Strait Fisheries

What are the Australia-PNG catch sharing arrangements this season?

The Torres Strait Treaty recognises the rights of both Australia and PNG to commercial fisheries in the area of the Torres Strait Protected Zone (TSPZ). The TSPZ is an area in the Torres Strait that includes both Australian and PNG waters. These rights include the right of Australia and PNG to fish in the waters of the other country. This practice is known as cross-endorsement and involves both countries nominating an agreed number of commercial fishing boats to fish an agreed share of the TAC. This share is usually 25% of the other country's TAC apportionment, unless otherwise agreed.

At their meeting held on 28 January 2020, AFMA and the PNG National Fisheries Authority (NFA) agreed the following:

- a. As per Article 22(1) of the Treaty, the global TAC of 582.1 tonnes is to be apportioned within each jurisdiction equal to 85 per cent (494.785 tonnes) in Australian waters and 15 per cent in PNG waters (87.315 tonnes);
- b. Australian boats can take in Australian waters, part of the cross-endorsement catch entitlement ordinarily available to PNG boats in Australian waters, equivalent to Australia's cross-endorsement catch entitlement in PNG waters (equal to 21.829 tonnes);
- c. The remaining part of the PNG's cross-endorsement catch entitlement (101.867 tonnes) remains available for PNG boats to take in Australian waters under cross-endorsement arrangements; and
- d. In return, AFMA will not seek access to Australia's cross-endorsement catch entitlement in PNG waters and that this can instead be taken by PNG boats in PNG waters.
- e. This is consistent with the PZJA agreement (on 19 November 2019) that subject to further consultation with stakeholders, the preferred arrangement for utilising Australia's cross-endorsement allocation within PNG's waters is to not seek cross-endorsement but rather pursue a preferential entitlement arrangement under Article 25 of the Treaty. AFMA remains committed to undertaking broader consultation with stakeholders, including licence holders, regarding the future utilisation of Australia's cross-endorsement allocation within PNG's waters.

At a subsequent meeting on 5 May 2020, Australia and the PNG NFA further agreed that:

- a. PNG would seek to access 60 tonnes of the 101.867 tonnes of TRL available to PNG boats in Australian waters under cross-endorsement arrangements; and
- b. pursuant to Article 25 of the Treaty, under preferential entitlement, the remaining 41.867 tonnes of PNG's catch entitlement in Australian waters would be made available for Australian boats.

A summary of the final arrangements is provided in Table 2 below, and illustrated in an infographic provided in Enclosure B.

Table 2. TAC apportionments and agreed cross-endorsement amounts for the TRL Fishery for the 2019-20 fishing season.

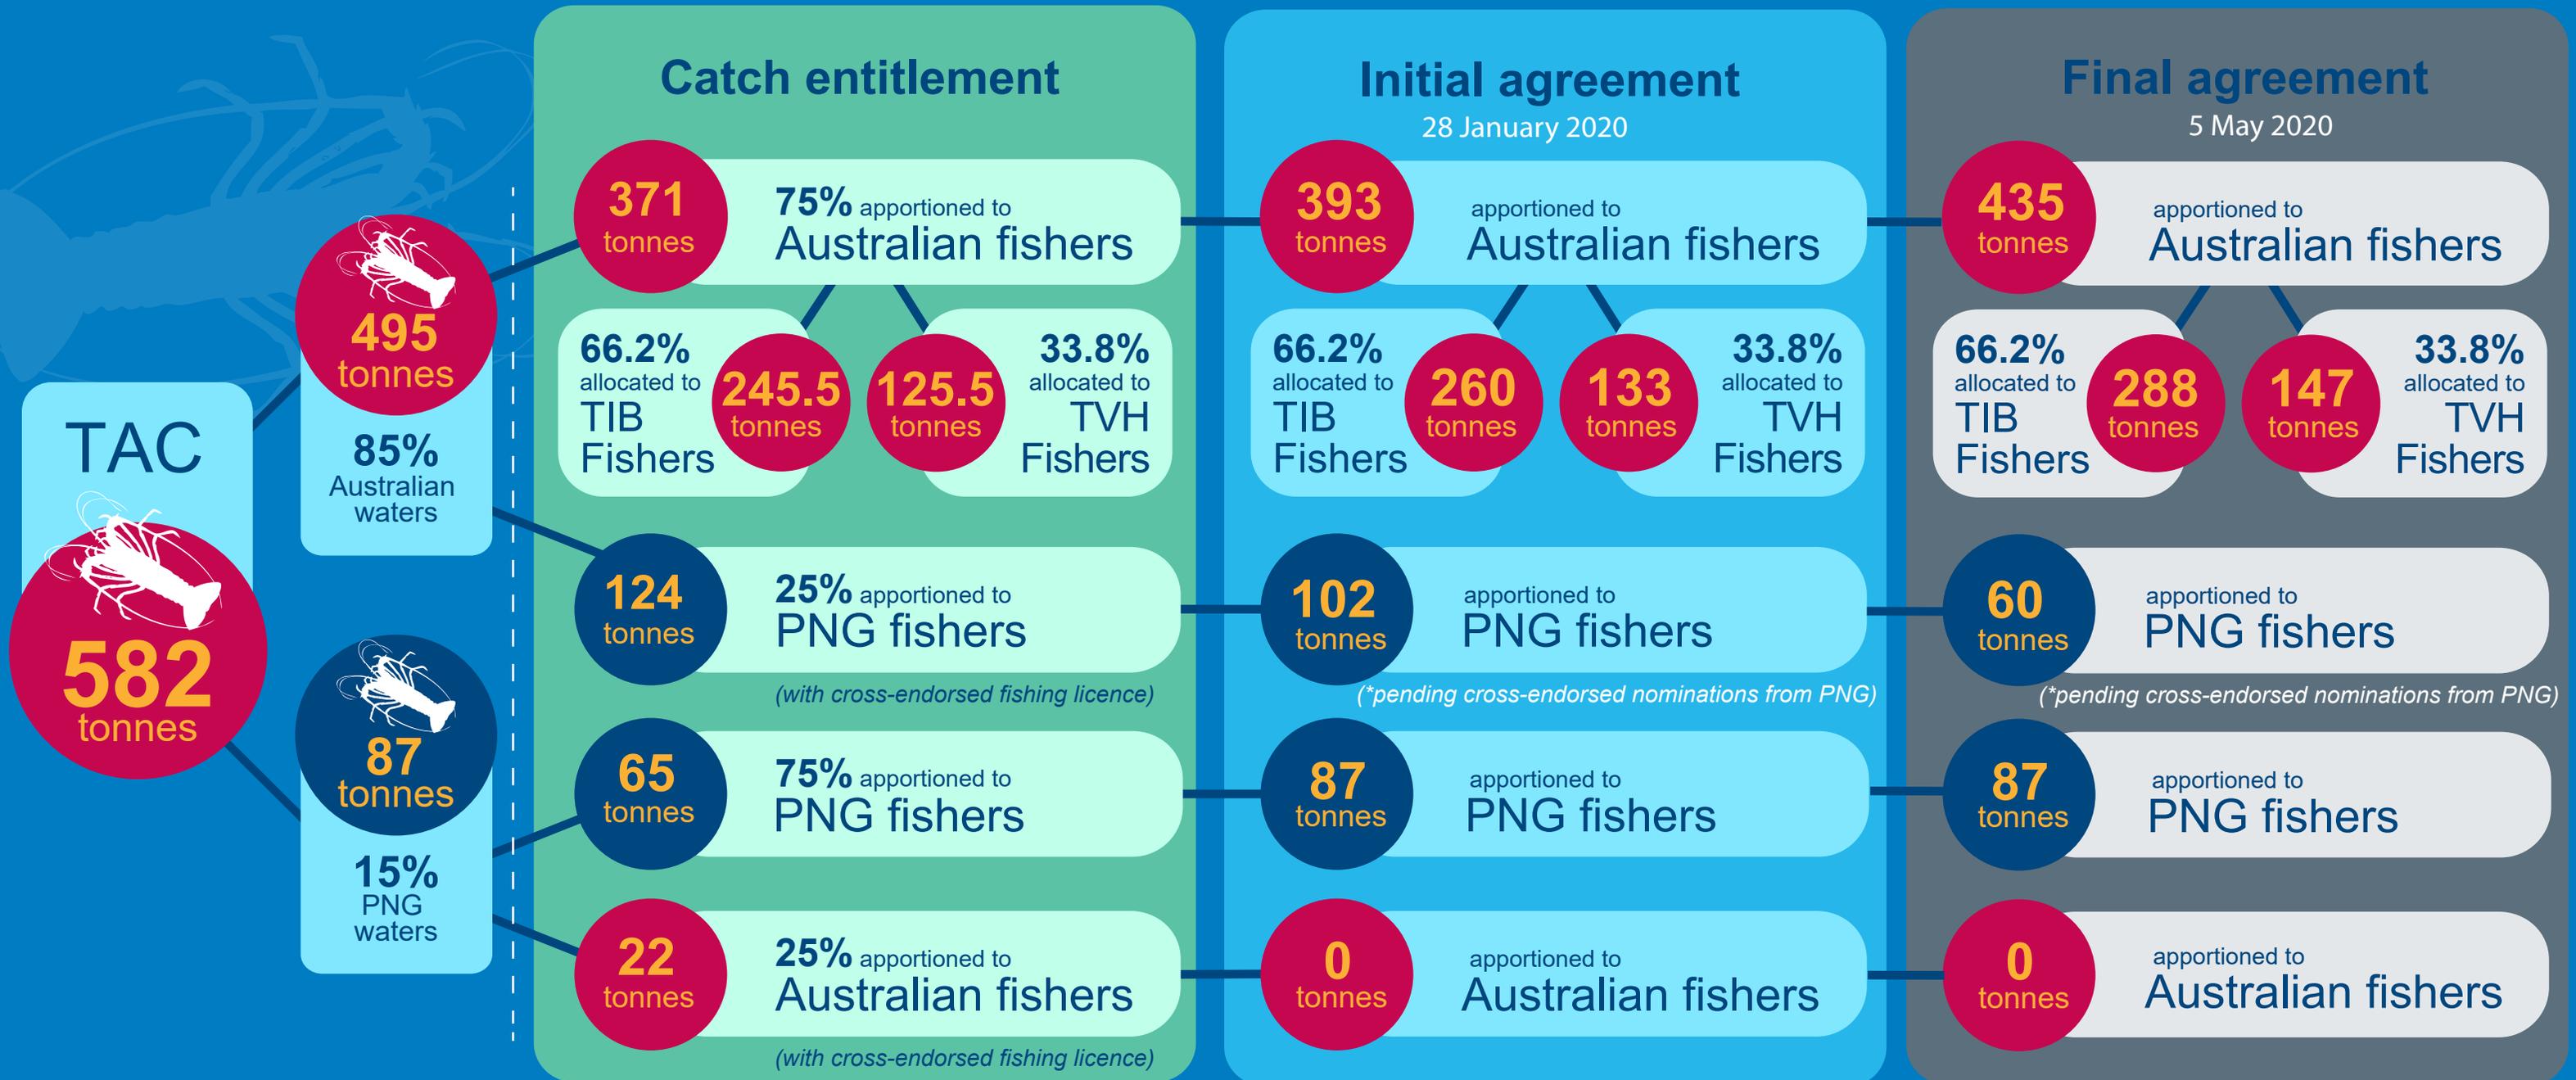

Jurisdiction	Total Apportionment (kg)	Final TAC apportionment for PNG vessels (kg)	Final TAC apportionment for Aus vessels (kg)
Australia	494,785 (85%)*	60,000#	434,785^
Papua New Guinea	87,315 (15%)*	87,315	0
Total	582,100	147,315	434,785

* Based on the agreed distribution of TRL stocks in the TSPZ TRL Fishery between Australian and PNG waters.

Of an available 101,867.5kg available to PNG under Article 23(4) of the Torres Strait Treaty whereby each Party is entitled to 25% of the catch share in the other Party's jurisdiction, to be accessed through Treaty cross-endorsement.

^ Includes the remaining 41,867kg available to Australia under Article 25 of the Treaty whereby Parties can agree to transfer all or part of a given catch entitlement to the other Party.

TORRES STRAIT TRL CATCH SHARING AGREEMENT 2019-20

TAC values have been rounded illustrative purposes only.

How much can I catch?

The 2019-20 fishing season for the Torres Strait Tropical Rock Lobster Fishery (TRL Fishery) is until 30 September 2020 or until available quota units have been caught.

If you are fishing under a TIB licence

- 662,016 quota units, with a value of **287,835.49 kilograms** of TRL is available to be caught by Traditional Inhabitant Boat (TIB) licence holders.
- When this amount has been caught, TIB licence holders will no longer be permitted to fish commercially in the TRL Fishery (unless the total allowable catch (TAC) has been increased – see above).
- TIB licence holders will be provided with a notice by the Commonwealth Minister for Fisheries when this occurs.
- The mandatory Fish Receiver System (catch disposal records) will be used to account for catches by TIB licence holders against the TIB sector's quota holdings (held by the Torres Strait Regional Authority (TSRA) in trust).
- If a TRL is tailed, a weight conversion factor of 2.677 will be applied. This means that if an individual lands 1 kilogram of tailed TRL, 2.677 kilograms of TRL will be deducted from the uncaught quota amount.
- AFMA will monitor the catches of TIB licence holders against the TIB sector's quota holdings, and provide regular catch reports throughout the season to TRL Fishery licence holders on the remaining catch that is available to be taken. These reports will be made available on the Protected Zone Joint Authority (PZJA) website at www.pzja.gov.au and also sent to TRL Fishery licence holders by email and SMS where licence holders have these details registered with AFMA.
- Licence holders will also be able to check the catches of the TIB sector against the TIB sector's quota holdings at any stage by contacting the AFMA Thursday Island office on 07 4069 1990 or FisheriesTI@afma.gov.au.

If you are fishing under a TVH licence

- 337,981 quota units, with a value of **146,949.51 kilograms** of TRL, have been allocated to individual Transferable Vessel Holder (TVH) licence holders.
- Each TVH licence holder will receive an extract of the Register detailing the number and value of the quota units held by the individual based on this TAC increase.
- When all the quota units (including any leased units) held by a TVH licence holder have been caught, the licence holder will no longer be permitted to fish commercially in the TRL Fishery.
- It is the responsibility of each TVH licence holder to monitor their catches against the quota units that they hold.
- The Fish Receiver System (catch disposal records) will be used to account for TVH licence holders' catches against their quota unit holdings.
- If a TRL is tailed, a weight conversion factor of 2.677 will be applied. This means that if an individual lands 1 kilogram of tailed TRL, 2.677 kilograms of TRL will be deducted from the individual's uncaught quota amount.

- AFMA will provide regular catch reports detailing the total catch by the TVH sector (not individual catches). These reports will be made available on the PZJA website at www.pzja.gov.au and also sent to TRL Fishery licence holders by email and SMS where licence holders have these details registered with AFMA.
- TVH licence holders will also be able to check their quota holdings at any stage throughout the season by registering for GOFish, AFMA's e-licensing system. Licence holders can do this by contacting the AFMA Licensing team on 02 6225 5555 or licensing@afma.gov.au.
