

# AFMA CATCHWATCH

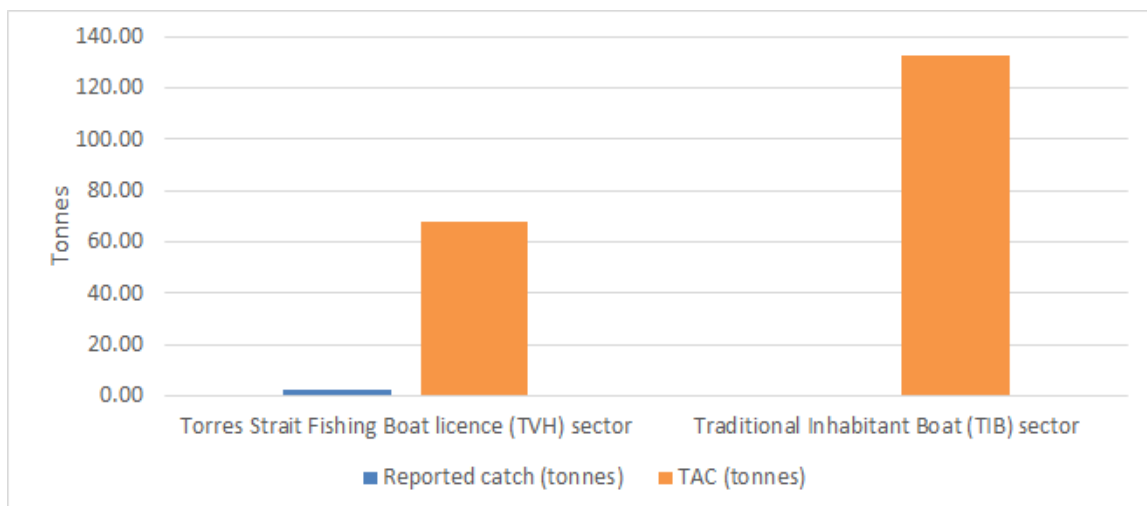

A REPORT FROM THE AUSTRALIAN FISHERIES MANAGEMENT AUTHORITY

Notice Issued on 18 January 2021

## Torres Strait Tropical Rock Lobster Fishery - Data Period 1 December 2020 to 18 January 2021

| Species Name  | Total Allowable Catch*<br>(TAC)<br>(tonnes) | Reported Catch^<br>(tonnes) | Remaining<br>TAC (tonnes) | % caught of<br>TAC |
|---|---|-----------------------------|---------------------------|--------------------|
| <b>Traditional Inhabitant Boat licence (TIB) sector</b> |   |                             |                           |                    |
| Tropical Rock Lobsters                                  | 132.4                                       | 4.37                        | 128.03                    | 3.3 %              |
| <b>Torres Strait Fishing Boat licence (TVH) sector</b>  |   |                             |                           |                    |
| Tropical Rock Lobsters                                  | 67.6  | N/A*                        | N/A*                      | N/A*               |

### Reported Catch vs Total Allowable Catch (TAC)

#### Notes:

^ Catch reported through TDB02 Catch Disposal Records (CDRs) and does not include any unreported catches or outstanding catches (there is an expected processing delay of 2-3 weeks from when a Fish Receiver completes a CDR and AFMA receives and processes it). All catch data reported as 'tails' is converted to whole weight using the conversion factor of 2.677.

\* In accordance with AFMA's Information Disclosure Policy, catch amounts have not been provided as the catch reported is from less than 5 boats. AFMA continues to closely monitor individual catches against quota holdings.
