

## TORRES STRAIT LICENCE REGISTER

### Fact Sheet

The Torres Strait Licence Register lists all Torres Strait licence holders including Traditional Inhabitant Boat (TIB) licences, Transferrable Vessel Holder (TVH) licences, Sunset licences, Master Fisherman’s licences, Carrier licences, Carrier-Processor licences and Fish Receivers licences.

The register also includes how many quota units are held by TVH licence holders in the TRL Fishery, how many kilograms of Spanish mackerel, coral trout and other reef line species are leased to Sunset licence holders in the Finfish Fishery, and which fishery entries each licence is authorised for:

- BD Beche-de-mer
- CB Crab
- CR Tropical rock lobster
- LN Reef line
- MK Spanish mackerel
- PL Pearl shell
- TR Trochus

The register allows fish receivers to check that they are receiving fish from licenced fishers, prior to completing a Catch Disposal Record. It allows fishers wanting to unload their catch to know who has a Fish Receiver licence.

Latest updates of the register can be accessed on the AFMA website under the Torres Strait Fisheries tab at:

<https://www.afma.gov.au/fisheries-services/concession-holders-conditions>

The register is updated monthly. Licence holders can also contact AFMA directly to check the status of a licence at any time.
